Proposed Project Description:

Online Attendance Management System project provides an easy way of keeping record of student attendance in any institute or college. This web application contains all the features of any attendance management software. This application is very easy to analyses student attendance performance.

Functionality Provided:
- Student Page: The page where the students are listed and managed.
- Check Attendance Page: The page where the faculties manage the attendance of their students.
- Attendance Report Page: The page where the recorded or stored attendance data shown and information about how many days leave can be applied.
- Course Page: The page where the system admin or staff manages the list of courses.

Contribution:

Ayushee Bansal → Course page.

Bhagyashree Hegde → Attendance Report Page

Ayushi Singh → Student Page

Nimish Bhasu → Check attendance Page

Thank You!
